### ***Abandonment Withdrawal***

Based on decision on the Petition filed on 7-5-2001, the holding abandonment is withdrawn.

### ***Response to Arguments filed on 4-27-2001***

Applicant's arguments with respect to claims 38-40 have been considered but are moot in view of the new ground(s) of rejection.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 38-40 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-23 of U.S. Patent No. 5,923,625. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 38-40 of present application are broad enough to read on claims 1-23 of above patent.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 38-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Okazaki et al (US 5,357,493).

Okazaki et al disclose a magneto optical memory device for overwriting information on magneto optical recording medium by using a pair of light spots. In Okazaki et al disclose means for irradiating a rewritable recording medium with a light beam having wavelength  $\lambda_1$  to produce information recorded on the medium and irradiating the rewritable recording medium with a light beam having wavelength  $\lambda_2$  to record information onto the medium, where  $\lambda_1$  is different from  $\lambda_2$  (col. 7, lines 22-66, Fig 4). The light beam of wavelength  $\lambda_1$  and  $\lambda_2$  are irradiated at different positions from each other on the medium (col. 7, lines 36-40) .
